

List of recommended tablets for Time Drops:

General minimum requirements:

For 6 lanes or less: 7 or 8 inch screen works great. 10 inch nice to have

For 6-10 lanes: 10 inch screen required as 8 inch will become cramped

Minimum Android version: Android 7.1 (Nougat), FireOS 6 and up for Amazon Kindle Fire tablets (2018 or later models)

Minimum 2 GB RAM, 16 GB Flash is sufficient as long as you do not plan on installing many other apps besides the timing app.

Minimum Bluetooth 4.2 required (BT 4.0 will not work)

Minimum screen resolution: HD (>= 720p) works OK but looks blocky on 10 in tablets. FHD(>=1080p) looks nicer

Amazon Kindle Fire tablets are supported by the system but require an Amazon account to log in. It is not recommended to log in with your personal Amazon account if this tablet is to be shared with team members. And creating a new account for the team may require a credit card. For this reason we do not recommend buying a Fire tablet specifically for Time Drops, but they do work if you happen to have one.

The Time Drops app also works fine on most Chromebooks, feel free to try it. However we do not provide support for this.

There are many Android tablets in the market which will do the job. But some off-brand tablets sold on Amazon don't have the required Bluetooth level (4.2), please check carefully. The listed models have been specifically tested with the system and are proven to work.. Tablets get updated regularly, usually you want to get the latest version (e.g., gen 3 vs gen 2, Tab A9 vs Tab A8)

Brand	Model	SKU / part #	Screen	Charging / Battery	RAM / FLASH	Android version	Approx. MSRP
Lenovo	Tab M10 FHD Plus gen2	ZA5T0380US	10.3" FHD (1920 x 1200)	USB-C / 5000 mAh	2 GB/32GB	10	\$159
